

Dear EKKO Church,

Access to clean water is now a reality for thousands of people in Nepal! On behalf of everyone at charity: water, thank you. Your Water Project Sponsorship in 2020 helped fund this work, and I'm excited to tell you more about your impact.

First, 100% of your generous donation funded 4 Piped System Tap Stands.

Your donation was included in the \$1,583,801.56 granted to Nepal Water for Health (NEWAH) which ultimately funded 2,109 water projects and served 26,441 people total.

As you look through the following pages and consider the impact of your generosity, I'd love to invite you to pause and picture all of the men, women, and children who finally have access to life's most basic need. Some people have waited their entire lives for this moment, and you helped make it possible.

I also want to take time to recognize our local partner, NEWAH. Thanks to their hard work, people living in the Sindhuli and Baglung Districts no longer have to walk long, dangerous distances for water. One woman named Chelimaya told NEWAH that she used to wake up at 4 a.m. to collect water. It took her an hour and a half roundtrip, and she usually had to wait in line, too. Now, she has access to a community tap stand near her home. "[Access to clean water] seemed like a dream," Chelimaya shared. "But the unexpected has come true. Now I am happy and hopeful."

I am honored to oversee our partnership, implementation strategy, and commitments in Nepal. As a Water Programs Senior Manager, I get to witness the life-changing impact of clean water every day. It brings health to communities once weakened by disease, gives children access to the education they deserve, and restores everyone's hope in the future through economic empowerment.

Your kindness is rewriting stories for people like Chelimaya in Nepal. Thank you so much.

Sincerely,

Stephanie Goetz
Water Programs Senior Manager, charity: water

Dear EKKO Church,

Access to clean water is now a reality for thousands of people in Nepal! On behalf of everyone at charity: water, thank you. Your Water Project Sponsorship in 2020 helped fund this work, and I'm excited to tell you more about your impact.

First, 100% of your generous donation funded 6 Piped System Tap Stands in the Karnali Province.

Your donation was included in the \$1,100,003 granted to HELVETAS Nepal which ultimately funded 2,704 water projects and served 18,643 people total.

As you look through the following pages and consider the impact of your generosity, I'd love to invite you to pause and picture all of the men, women, and children who finally have access to life's most basic need. Some people have waited their entire lives for this moment, and you helped make it possible.

I also want to take time to recognize our local partner, HELVETAS Nepal, and highlight their focus on sustainability. Well before construction begins, HELVETAS Nepal works with each municipality to develop a Water Use Master Plan. This participatory approach considers all water sources, uses, and demands, and helps HELVETAS Nepal select project sites. HELVETAS Nepal also conducts feasibility and design studies for each project site and invests in public awareness campaigns. All of this pre-planning ensures that clean water keeps flowing for years to come.

I am honored to oversee our partnership, implementation strategy, and commitments in Nepal. As a Water Programs Senior Manager, I get to witness the life-changing impact of clean water every day. It brings health to communities once weakened by disease, gives children access to the education they deserve, and restores everyone's hope in the future through economic empowerment.

Your kindness is rewriting stories for people in Nepal. Thank you so much.

Sincerely,

Stephanie Goetz

Dear EKKO Church,

Access to clean water is now a reality for thousands of people in Malawi! On behalf of everyone at charity: water, thank you. Your Water Project Sponsorship in 2020 helped fund this work, and I'm excited to tell you more about your impact.

First, 100% of your generous donation funded 1 Well with a Hand Pump in the Ntcheu District.

Your donation was included in the \$449,632.38 granted to World Vision Malawi which ultimately funded 62 water projects and served 18,784 people total.

As you look through the following pages and consider the impact of your generosity, I'd love to invite you to pause and picture all of the men, women, and children who finally have access to life's most basic need. Some people have waited their entire lives for this moment, and you helped make it possible.

I also want to take time to recognize our local partner, World Vision Malawi. One of the water points they built serves a local primary school and the surrounding communities. A student at the school, Beatrice, shared that the closest water point used to be half a mile away. "We would come back tired and fail to concentrate in class," Beatrice shared. "But now our lives have been made easy," she continued, smiling. "Our classes will always be clean, our gardens will always be green, and our performance will always be good."

I am honored to oversee our partnership, implementation strategy, and commitments in Malawi. As a Water Programs Senior Manager, I get to witness the life-changing impact of clean water every day. It brings health to communities once weakened by disease, gives children access to the education they deserve, and restores everyone's hope in the future through economic empowerment.

Your kindness is rewriting stories for people like Beatrice in Malawi. Thank you so much.

Sincerely,

Michaela Walsh
Water Programs Senior Manager, charity: water

Note: Beatrice's name has been changed in keeping with our Child Protection Policy.

Dear EKKO Church,

Access to clean water is now a reality for thousands of people in Madagascar! On behalf of everyone at charity: water, thank you. Your Water Project Sponsorship in 2020 helped fund this work, and I'm excited to tell you more about your impact.

First, 100% of your generous donation funded 3 Piped System Tap Stands in the Atsinanana Region.

Your donation was included in the \$1,131,831.05 granted to Catholic Relief Services (CRS) which ultimately funded 708 water projects and served 25,212 people total.

As you look through the following pages and consider the impact of your generosity, I'd love to invite you to pause and picture all of the men, women, and children who finally have access to life's most basic need. Some people have waited their entire lives for this moment, and you helped make it possible.

I also want to take time to recognize our local partner, CRS. Every system they build is designed to accommodate a growing population for up to 15 years. This is especially good news for people like Christian—a man who watched his community get clean water and then lose it. Christian shared that they used to have a water point years ago (built by another entity), but it hadn't kept up with the growing community. The water flow slowed down, the water quality declined, and soon, people were getting sick again. Now that CRS' projects are complete, health has thankfully improved for Christian, his family, and his community.

I am honored to oversee our partnership, implementation strategy, and commitments in Madagascar. As the Head of Programs, I get to witness the life-changing impact of clean water every day. It brings health to communities once weakened by disease, gives children access to the education they deserve, and restores everyone's hope in the future through economic empowerment.

Your kindness is rewriting stories for people in Madagascar. Thank you so much.

Sincerely,

Michelle Jackson Riewer
Head of Programs, charity: water

A note about proof and piped systems

The water project(s) you generously funded are household tap stands that are a part of a larger piped system. To protect and respect the privacy of individual households, we only share the GPS coordinates of the larger piped system and photos from a select few households. However, please be assured that every report represents a distinct project. You can learn more about our business rules for household-level projects in [this document](#). Thank you again for making clean water possible!

Dear EKKO Church,

Access to clean water is now a reality for thousands of people in India! On behalf of everyone at charity: water, thank you. Your Water Project Sponsorship in 2020 helped fund this work, and I'm excited to tell you more about your impact.

First, 100% of your generous donation funded 1 Ultrafiltration System for schools in the city of Kolkata.

Your donation was included in the \$1,049,983.96 granted to Splash India which ultimately funded 111 water projects and served 56,639 people total.

As you look through the following pages and consider the impact of your generosity, I'd love to invite you to pause and picture all of the men, women, and children who finally have access to life's most basic need. Some people have waited their entire lives for this moment, and you helped make it possible.

I also want to take time to recognize our local partner, Splash India. Before being introduced to Splash India, Arjun's school had just one toilet block and no safe drinking water. Students and teachers had gotten sick on several occasions due to the lack of facilities, and as the headmaster, Arjun was determined to make changes. Splash India provided the support and expertise Arjun needed, and the school now has new toilet blocks, clean drinking water, and handwashing stations. What makes this story even better is knowing that it's just one of many across Kolkata.

I am honored to oversee our partnership, implementation strategy, and commitments in India. As a Water Programs Senior Manager, I get to witness the life-changing impact of clean water every day. It brings health to communities once weakened by disease, gives children access to the education they deserve, and restores everyone's hope in the future through economic empowerment.

Your kindness is rewriting stories for people in India. Thank you so much.

Sincerely,

Stephanie Goetz
